

BOARD OF COUNTY COMMISSIONERS
SARPY COUNTY, NEBRASKA

RESOLUTION AUTHORIZING EXTENSION OF CONTRACT FOR LANDFILL
ENGINEERING AND TECHNICAL SERVICES

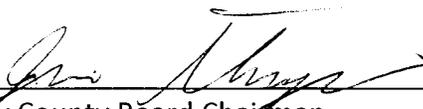

WHEREAS, pursuant to Neb. Rev. Stat. §23-104(6) (Reissue 2012), the County has the power to do all acts in relation to the concerns of the county necessary to the exercise of its corporate powers; and,

WHEREAS, pursuant to Neb. Rev. Stat. §23-103 (Reissue 2012), the powers of the County as a body are exercised by the County Board; and,

WHEREAS, it is the desire of the County Board to extend the contract with Thompson, Dreessen & Dorner, Inc. for engineering and technical services related to solid waste disposal, as shown on the attached letter and schedules.

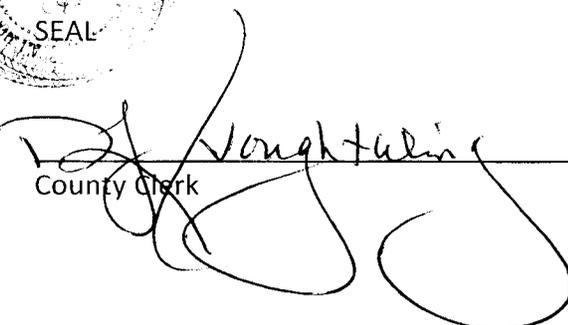

NOW, THEREFORE, BE IT RESOLVED BY THE SARPY COUNTY BOARD OF COMMISSIONERS THAT the Chairman of this Board together with the County Clerk be and hereby are authorized to take such action as may be necessary on behalf of this Board to extend the contract with Thompson, Dreessen & Dorner, Inc. for engineering and technical services relating to solid waste disposal, as shown on the attached letter and schedules.

The above Resolution was approved by a vote of the Sarpy County Board of Commissioners at a public meeting duly held in accordance with applicable law on the 21st day of October, 2014.

Sarpy County Board Chairman

County Clerk

MEMO

To: Sarpy County Board of Commissioners

From: Beth Garber

Re: Landfill Engineering & Technical Services

Since 1990 Sarpy County has had an agreement with Thompson, Dreessen & Dorner for engineering and technical services at the Landfill. The agreement is typically extended by two (2) year increments based on prospective services, such as monitoring, permitting and final capping. Sarpy County will only pay for the services actually utilized. The estimated costs for 2015 are \$339,700.00 and \$291,000.00 for 2016.

Major items included in the 2015 estimate are:

- Soil vapor extraction system
- Water testing at the Cedar Island Road Landfill
- Air quality and storm water permit reporting
- Design of Phase VI cap

Major items included in the 2016 estimate are:

- Groundwater and landfill gas monitoring work at Cedar Island Road Landfill
- Air quality and storm water permit monitoring
- Phase VI cap construction services
- Water testing and greenhouse gas reporting

This has been placed on the October 21, 2014 Board agenda for recommended approval. Should you have any questions, please feel free to contact me at (402) 593-4476.

RE: Technical Services
Sarpy County Landfill Sites
TD2 File No. 229-217.70

Duwaine:

Enclosed is a detailed estimate of costs for technical services for calendar years 2015 and 2016 relating to solid waste disposal. For the sake of clarity, we have separated the estimated TD2 man-hours from other consultants who provide specialized services. Other consultants include Alfred Benesch & Company who provides water tests and hydrogeologic expertise, HDR Inc for landfill gas expertise and, as yet, unnamed subcontractors who specialize soil vapor extraction systems and in QA/QC programs for the geosynthetic elements of final caps.

According to the summary, we estimate that a technical services budget of \$339,700.00 is warranted for calendar year 2015 and \$291,000.00 for 2016. A review of recent billings indicates that approximately 57% of the 2013 and 2014 technical services budget (to date) for TD2 provided services was actually used. The estimated budget for 2013 and 2014 technical services had included construction of the Phase 6 final cover that has been delayed until 2016.

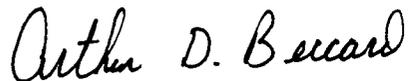

The 2015 budget includes a soil vapor extraction system, expanded landfill gas monitoring, and ground water sampling / analysis at the Cedar Island Road Landfill. It also includes permit renewal documentation, ground water sampling / analysis, greenhouse gas reporting, industrial storm water permit monitoring, air quality permit renewal and reporting, landfill gas system operation and maintenance, design for the Phase 6 cap and on-going technical assistance at the Fairview Road site. The 2016 budget includes ground water and landfill gas system operating / monitoring work at Cedar Island Road Landfill. It also includes air quality permit reporting, industrial storm water permit monitoring, Phase 6 cap construction services, water testing, greenhouse gas reporting, landfill gas system operation and maintenance and on-going technical assistance at the Fairview Road site. NDEQ requirements also tend to increase, creating needs for additional technical services. We estimate that we (TD2) will provide approximately 57% of your required technical services for the two-year period of 2015 and 2016.

We are available to discuss any of these estimates in more detail with you. If that is not necessary, we request an extension of our existing contract using the 2015 and 2016 schedules. We appreciate the opportunity of working with you. We continue to believe that the Sarpy County Landfill is a leader in the industry.

Mr. Duwaine Brigman
